PROFESSIONAL SUMMARY

Senior FinTech Data Scientist & Analyst with 4+ years of experience bridging Quantitative Research and Portfolio Management systems. Expert in Python, R, and SQL for cleaning, structuring, and automating large-scale global financial datasets. Proven track record of architecting end-to-end ETL pipelines that reduced manual analysis and reporting time by 40% for institutional-grade research at LYNEAR and BITROCK. Uniquely qualified with a First-Class Honours degree in Finance and a distinction-level MSc in Business Analytics to ensure the highest levels of data integrity for ETF and Indexing analytics. Experienced in deploying scalable, cloud-based (AWS/GCP) intelligence solutions and passionate about transforming complex financial data into actionable SaaS insights.

TECHNICAL SKILLS & COMPETENCIES

BI & Data Engineering: Power BI (Advanced DAX), Tableau, SQL (MySQL/PostgreSQL), Python ETL Pipelines, AWS (EC2/S3/RDS)

FinTech & Quantitative: Time-Series Forecasting (LSTM/Neural Prophet), Financial Modeling, Risk Analytics, Python (Pandas/NumPy)

Artificial Intelligence & GenAI: LangChain, OpenAI/Gemini APIs, RAG Systems, Artificial Intelligence Agents, Web Scraping (Crawl4AI), Cybersecurity Protocols

Development: C# (.NET Core), React.js, JavaScript, HTML/CSS, Docker, CI/CD, Git

PROFESSIONAL EXPERIENCE

Senior Software Engineer - Data & Analytics

Jan 2023 – Present

LYNEAR Wealth Management (PVT) Ltd | Sri Lanka

- FinTech Engineering:** Maintained and optimized in-house portfolio management systems using **C#, ASP.NET Core, and MySQL**, ensuring stability for investment teams.
- AI & RAG Implementation:** Developed "Artificial Intelligence Agents" using LangChain and RAG architecture to automate the gathering of intelligence from financial reports and YouTube transcripts.
- Cybersecurity & Governance:** Partnered with external vendors to enforce strict security protocols across **AWS and Microsoft infrastructures**; protected sensitive company data using **AWS IAM roles, Microsoft Admin Center, Intune, and Purview** to implement least-privilege policies.
- Predictive Modeling:** Built production-grade ML models (CNN, LSTM) for forecasting exchange rates and commodities, providing quantitative backing for investment decisions.
- DevOps:** Established DevOps SOPs and automated deployment pipelines, reducing release time.

Research Analyst - Data & Market Intelligence

May 2022 – Jan 2023

BITROCK (Lyceum Global Holdings) | Sri Lanka

- Automated Insights:** Built Python data collection pipelines feeding into Power BI, reducing manual reporting time by 40%.
- Market Analysis:** Conducted fundamental analysis of US equity and cryptocurrency markets to support strategic investment directions.

Trainee Data Analyst - Business Intelligence

Oct 2021 – May 2022

LAUGFS Supermarkets (PVT) Ltd | Sri Lanka

- Customer Analytics:** Monitored performance across 50+ retail locations, using Power BI to identify sales drivers and customer retention opportunities.
- Forecasting:** Improved budget accuracy through time-series analysis of sales data.

EDUCATION

MSc Business Analytics (Artificial Intelligence & Data Science) Robert Gordon University (UK) Distinction Grade (PgDip completed) <i>Modules: Big Data Analytics, Cloud Computing, Machine Learning, NoSQL, Text Analytics</i>	2024 – Present
BSc (Hons) Finance University of Sri Jayewardenepura First Class Honours (GPA: 3.76) <i>Specialization: Corporate Finance, Financial Markets, Quantitative Methods</i>	2017 – 2022

KEY PROJECTS & PUBLICATIONS

Financial Market Intelligence Bot Engineered a system enabling conversational search within financial PDFs using Vector Databases and OpenAI. Implemented context-aware retrieval to reduce research time for analysts.
Artificial Intelligence Web Scraper & Parser Automated extraction of unstructured web data into structured formats for market analysis using Python and Crawl4AI. Integrated with OpenAI API to classify and summarize financial news.
Publication: "Building a RAG Pipeline for YouTube Videos" Authored a technical article on Medium (Feb 2025) detailing the architecture for video content analysis using LangChain. (500+ reads)
Publication: "Named Entity Recognition (NER) in Web Analytics" Published research (Jan 2025) on extracting named entities from unstructured web data to improve data categorization.

CERTIFICATIONS

- **Google Cloud:** Migrate MySQL data to Cloud SQL (Skill Badge, Dec 2025)
- **Google Cloud:** Deploy Kubernetes Applications (Skill Badge, Nov 2025)
- **Google Cloud:** BigQuery ML Predictive Modeling (Skill Badge, 2025)
- **OpenCV University:** Computer Vision Bootcamp (2024)
- **Microsoft:** Power BI Data Analyst (In Progress)
